

TESTIMONIAL

I am Sapan Grewal from Chandigarh. I came to Gurgaon for pursuing MBA. After few months of joining college I got lumbar sacral spondylitis and with passage of time I got cervical spondylitis also. Initially I went to some private doctors but they were not able to treat me. Then I went P.G.I. Chandigarh for check up, they asked to do some exercises related to back but the problem didn't got over even after 2 months of exercise. Then In Gurgaon, I went Paras Hospital, I got different reviews from 2 different doctors. One told me Osteoporosis problem and the other doctor told me that its by birth problem. I suffered from lot of pain especially in winters. Its more than a year now, My neck got so stiff that I could hardly move my neck either to left or right. That was the most painful time. The pain was so much that It restricted me from walking. Then my friend **Sachin** told me about **Dr. V.K.Porwal**, we went there with great hopes. I completed 12 sessions with Accupunture therapy and 2 Moxibustion therapy and I am so glad that my neck is back to normal without any pain. Now even after working for long hours, my neck is perfectly fine. No pains, no stiffness nothing..Now I can work without getting tensed about my neck.

Today, I am happy that **Dr V.K. Porwal** treated me and I want to thank him for curing me.
